

We are experts
in surveying
hotels quickly,
methodically and
in high detail.

In the last three years CAD Surveys has surveyed seven very large hotels and has been surveying hotels starting with the Langham hotel, London 15 years ago.

CAD Surveys was established 20 years ago. We have invested heavily in survey equipment enabling us to deploy eight operatives all with laser scanners and 360 cameras to survey large hotel in just a few days.

/ s u r v e y s /

In the last month we surveyed a 180 'key' hotel in under four days.

In the last three years we have surveyed in high detail:

- Randolph, Oxford
- Hilton, Cambridge
- Marine Hotel Troon
- Slieve Donard, Northern Ireland
- Lancaster London Hotel
- Marine Hotel, North Berwick
- The Rusacks, St. Andrews

The high detail includes internal elevations, small power, lighting, architraves, skirting, mouldings, reflected ceiling plans and a corresponding 360 photo tour to aid the designers with their designs who are often based overseas. Topographical surveys can also be performed.

A typical 360 tour that accompanies our drawing can be found here:
